

Spearfish Decision Accelerator

What it is

The Spearfish Decision Accelerator is a high-energy, collaborative meeting that improves results and reduces risk by increasing the speed, quality, and durability of decisions. It is for executives and managers who must transform their business or gain quick alignment on complex issues, from mergers and integration to new business innovation.

What makes it different

Traditional approaches of walking ideas around an organization, or proposing plans function by function are slow, fragmented, and ineffective at engaging your stakeholders. Instead, the Spearfish Decision Accelerator brings people together to work concurrently towards a rapid and practical solution. Working together teams synthesize critical insights, generate new directions, and create a concrete roadmap with commitment to action.

What you can expect

With your specific goals in mind Spearfish will design an event that will in the space of days, not weeks, propel your organization forward. Depending on the complexity of the challenge, events range in size from 20 to over 100 participants and run from 1.5 to 3 days in length.

Every event is based around a series of highly active working sessions that generate specific deliverables. By working together, teams produce and then continuously improve solutions, all while building teamwork and commitment. The result: accelerated decisions and agreements that advance both strategic and operational goals.

Spearfish Innovation

Spearfish Innovation translates your strategic initiatives into business results. We specialize in accelerating companies through inflection points in their life cycle – those moments when doing things the same old way just won't cut it.

Contact us

Spearfish Innovation has offices in Massachusetts, Silicon Valley, CA, and Washington. For more information see our web site:
